<i>Focusing on Lessons Learned</i>	<i>54</i>

Angelo Termite & Construction Company has been a business partner of the Apartment Association of Orange County since 1984, as well as a contributor of many articles published in the *Apartment News* magazine over the years.

We are the industry leader and authority in Orange County and are known for our unique, winning strategy in termite control and reconstruction for apartment owners, managers and real estate agents and brokers.

As a 40+ year firm located in South Orange County, Angelo Termite & Construction Company specializes in localized treatments, as opposed to the traditional fumigation, as well termite infestation and dry rot repair and reconstruction for multi-unit structures.

Licensed as a Structural Pest Control Operator, General Contractor & Roofing Contractor, there is no job that we cannot conquer.

Angelo Termite & Construction Company is also known as an innovator for education within the multi-family industry, including education related to SB 721. Our company has seven certifications from The California Department of Real Estate and CAMICB (Certified Manager of Community Associations) which provides us the opportunity to educate all within the multi-family industry.

“Wood Destroying Pests & Organisms” (termites, fungus dry rot, and moisture intrusion) is a serious concern and large liability exposure for apartment owners and managers. It is important to *know the condition of your properties*. Being **PROACTIVE** when wood destroying pests and organisms are present is the key to reducing hazardous conditions for the occupants of rental units and liability exposure for the property owners and management. Common area exterior inspections, such as balcony, decks and high traffic areas can be key to identifying existing conditions that may be hazardous or create a liability issue.

Experience and award-winning results means that Angelo Termite & Construction Company gets the job done with speed of service and a spirit of excellence. Angelo is a trusted company with a vast ledger of satisfied customers since 1976.
